

## Regions of Alberta

Alberta is a big province.

It has six natural regions.  
Can you find the six regions on  
the map?

Use the legend to color your map.

## Rocky Mountain Region

This region contains two national parks.

**What are they?**

**Why do we have national parks?**

This region covers the southwestern part of the province, near the provincial border with British Columbia and the border of the United States
